Foreword	iv
1 Introduction.....	2
Proposal Title.....	2
1.1 Development Proponent	3
1.1.1 Environmental Commitment and Responsibility	4
1.2 Development Overview	5
1.2.1 Resource under Consideration for Development.....	5
1.2.2 Background to this Development Proposal	6
1.2.3 In-principle Approval for Restricted Access to Barrow Island	7
1.2.4 Scope of the Proposed Development	7
1.2.5 Principal Elements of the Proposed Development.....	10
1.2.6 Relationship to Other Proposals in the Region	12
1.2.7 Development Timeline	14
1.3 Development Rationale.....	15
1.3.1 Market Opportunities.....	15
1.3.2 Consequences of Missing the Current Development Opportunity	16
1.4 Development Objectives	16
1.5 EIS/ERMP Process	17
1.5.1 Approach to the Impact Assessment	18
1.6 Key Concepts.....	19
1.7 Draft EIS/ERMP Purpose and Structure	21
2 Background to this Proposal.....	24
2.1 ESE Review Process.....	25
2.1.1 ESE Review Scoping Phase	25
2.1.2 ESE Review Investigation Phase.....	25
2.1.3 ESE Review Assessment Phase.....	27
2.2 Cabinet Decision	28
2.3 Barrow Island Legislation.....	29
2.3.1 Barrow Island Act 2003	29
2.3.2 State Agreement.....	30
2.4 Conclusion	33

3	Development Alternatives	34
3.1	Introduction	36
3.2	Previous Development Attempts	36
3.3	Overview of the Development Concept	36
3.4	Technical and Commercial Constraints	37
3.5	Assessment of Regional Locations	38
3.5.1	Comparison against EPBC Act Provisions	48
3.5.2	Most Suitable Development Location	51
3.5.3	Less Suitable Development Locations	52
3.5.4	Independent Technical Audit of Relative Costs	54
3.5.5	In-Principle Approval	55
3.6	Assessment of Barrow Island Sites	55
3.6.1	Selection Criteria	56
3.6.2	Possible Sites for the Gas Processing Facility	56
3.6.3	Redefine Development Concept	56
3.6.4	Assessment of Sites Against Selection Criteria	56
3.6.5	Most Suitable Development Site	58
3.6.6	Less Suitable Development Sites	61
3.7	Assessment of Feed Gas Pipeline Alternatives	62
3.7.1	Selection Criteria	62
3.7.2	Potential Sites for the Shore Crossing	63
3.7.3	Assessment of Potential Sites for the Shore Crossing	63
3.7.4	Preferred Shore Crossing Location	63
3.7.5	Less Preferred Shore Crossing Locations	66
3.8	Defer or Not Develop Alternative	66
3.9	Conclusion	66
4	Legislative Framework	68
4.1	Introduction	69
4.1.1	Key Environmental Approvals	69
4.2	Environmental Impact Assessment Process	70
4.2.1	Referral	70
4.2.2	Scoping	70
4.2.3	Investigations and Document Preparation	72
4.2.4	Government Assessment	72
4.3	Other Relevant Legislation	72
4.3.1	Subsequent Approvals for the Proposed Development	72
4.4	EPA Guidance Statements	72

5	Stakeholder Engagement	76
5.1	Introduction	77
5.2	Methods of Engagement	78
5.2.1	Community Consultation – Quarantine	78
5.2.2	Technical Workshops for Government and Industry Stakeholders	79
5.2.3	Briefings and Meetings	79
5.2.4	Regional Visits – Pilbara	79
5.2.5	Stakeholder Consultation Plan as Part of the Social and Economic Impact Assessment	79
5.2.6	Conferences and Forums	80
5.2.7	Barrow Island Site Visits	80
5.2.8	Supplier Communication	80
5.2.9	Media Announcements	80
5.2.10	Gorgon Australian Gas Website	81
5.3	Key Gorgon Development Stakeholders	81
5.3.1	Western Australian State Ministers, their Advisers and Members of State Parliament	81
5.3.2	Federal Ministers, their Advisers and Members of Federal Parliament	82
5.3.3	State Government Agencies of Western Australia	82
5.3.4	Federal Government Agencies	83
5.3.5	Regional Stakeholders – Pilbara	83
5.3.6	Conservation Organisations	84
5.3.7	Industrial Interests and Organisations	85
5.3.8	Academic and Scientific Organisations	85
5.3.9	Other Stakeholders	85
5.4	Key Issues Identified by Stakeholder Groups	86
5.5	Conclusion and Further Engagement Plan	93
6	Development Description	94
6.1	Introduction	96
6.1.1	Gas Compositions – Feed and Product	96
6.2	Major Infrastructure Components	96
6.2.1	Wells and Subsea Facilities	97
6.2.2	Feed Gas Pipelines	100
6.2.3	Gas Processing Facility	104
6.2.4	CO ₂ Injection Facilities	114
6.2.5	CO ₂ Monitoring Activities	115
6.2.6	Domestic Gas Pipeline	119
6.2.7	Water Supplies	120
6.2.8	Drainage and Waste Water System	120
6.2.9	Port and Marine Facilities	121
6.2.10	Supporting Facilities	124
6.2.11	Mainland Supply Base(s)	125
6.2.12	Estimated Land Use	125

6.3	Construction Activities	125
6.3.1	Construction of Offshore Wells.....	125
6.3.2	Construction of Onshore CO ₂ Injection Wells	127
6.3.3	Construction and Installation of Subsea Systems	127
6.3.4	Construction of the Feed Gas Pipeline	129
6.3.5	Construction of the Onshore Feed Gas Pipelines.....	132
6.3.6	Construction of the Gas Processing Facility and Infrastructure	133
6.3.7	Construction of Onshore Water Supply/Re-Injection Wells	141
6.3.8	Construction of Marine Facilities.....	142
6.3.9	Construction of the Domestic Gas Pipeline.....	144
6.3.10	Installation of the Optical Fibre Cable.....	144
6.3.11	Construction of Other Pipelines	144
6.3.12	Pipeline Hydrotesting.....	144
6.3.13	Onshore Equipment Hydrotesting	145
6.4	Pre-Commissioning, Commissioning, and Start-Up	145
6.4.1	Commissioning of the Gas Processing Facility.....	146
6.5	Operation of the Gorgon Development	146
6.5.1	Operation of the Offshore Facilities.....	146
6.5.2	Operation of the Gas Processing Facility.....	146
6.5.3	Operational Workforce.....	147
6.5.4	Transportation during Operations.....	147
6.6	Decommissioning.....	147
6.6.1	Decommissioning of Production Wells, Subsea Facilities and Flowlines	148
6.6.2	Decommissioning of Pipelines	148
6.6.3	Decommissioning of the Gas Processing Facility.....	148
6.6.4	Decommissioning of the Marine Facilities.....	149
6.6.5	Decommissioning of the Optical Fibre Cable.....	149
6.6.6	Decommissioning of the CO ₂ Injection Facilities	149
6.6.7	Decommissioning of the Water Supply/Injection Facilities	149
6.6.8	Decommissioning of the Dredge Spoil Disposal Site	149
7	Emissions from the Development.....	150
7.1	Introduction	152
7.2	Atmospheric Emissions.....	152
7.2.1	Predicted Emissions from Construction Activities	152
7.2.2	Predicted Emissions from Normal Operation of Gas Processing Facility.....	153
7.2.3	Predicted Emissions from Non-Routine Operation of Gas Processing Facility	156
7.2.4	Air Quality Criteria.....	157
7.2.5	Atmospheric Dispersion Modelling – Methodology	159
7.2.6	Current Emissions from Facilities on Barrow Island.....	166
7.3	Light Emissions	168
7.3.1	Current Light Emissions	168
7.3.2	Light Emissions from Construction Activities.....	168
7.3.3	Light Emissions from Operation of Proposed Development.....	169

7.4	Noise Emissions.....	172
7.4.1	Current Noise Emissions	172
7.4.2	Noise Emissions from Construction Activities	172
7.4.3	Noise Emissions from Operation of the Proposed Development	175
7.5	Solid Non-Hazardous Wastes.....	179
7.5.1	Current Waste Generation.....	179
7.5.2	Expected Development Waste Streams.....	179
7.6	Liquid Wastes.....	180
7.6.1	Liquid Waste Management.....	180
7.7	Hazardous Waste.....	183
7.7.1	Waste Generation and Expected Hazardous Waste Streams.....	183
7.8	Dredging and Dredge Spoil Disposal	184
7.9	Accidental Releases (Spills) to the Marine Environment	188
7.9.1	Control Measures used to Reduce Primary Risk of Hydrocarbon Release	190
7.9.2	Fate and Transport of Spilled Hydrocarbon	192
7.9.3	Other Potential Releases (Non Hydrocarbon)	202
8	Existing Environment.....	204
8.1	Introduction.....	207
8.2	Physical Environment.....	207
8.2.1	Introduction.....	207
8.2.2	Regional Setting	209
8.2.3	Climate.....	209
8.2.4	Bathymetry and Sea Floor Topography.....	211
8.2.5	Oceanography	212
8.2.6	Topography and Landforms	216
8.2.7	Geology and Soils	216
8.2.8	Seismic Activity	218
8.2.9	Surface Hydrology	218
8.2.10	Hydrogeology	220
8.3	Ecology	221
8.3.1	Introduction.....	221
8.3.2	Terrestrial Ecology	221
8.3.3	Marine Ecology	253
8.4	Social Environment	277
8.4.1	Introduction.....	277
8.4.2	Population Trends and Demographics	277
8.4.3	Lifestyles and Livelihood	277
8.4.4	Government Policies and Plans	278
8.4.5	Land and Sea Tenure and Use	278
8.4.6	Visual and Aesthetics	282
8.4.7	Cultural Heritage.....	282
8.4.8	Native Title	283

8.5	Economic Environment	284
8.5.1	National Economy	284
8.5.2	State Economy	284
8.5.3	Regional Economy of the Pilbara	285
8.5.4	Economic Policies Influencing the Gorgon Development	286
9	Risk Assessment Process	288
9.1	Introduction	289
9.2	Methodology	289
9.2.1	Identification of Stressors	292
9.2.2	Identification of Receptors	295
9.2.3	Definition of Consequences	295
9.2.4	Definition of Likelihood	299
9.2.5	Characterisation of Risk	299
9.2.6	Risk Management	299
9.3	Uncertainty	300
9.4	Conclusion	300
10	Terrestrial Environment – Risks and Management	302
10.1	Introduction	304
10.2	Physical Environment	304
10.2.1	Soil and Landform	306
10.2.2	Surface Water and Groundwater Quality	308
10.3	Flora and Vegetation Communities	324
10.3.1	Clearing and Earthworks	327
10.3.2	Emissions	330
10.3.3	Fire	332
10.3.4	Unpredicted CO ₂ Migration to Surface	333
10.3.5	Cumulative Risk	334
10.4	Terrestrial Fauna	347
10.4.1	Clearing and Earthworks	350
10.4.2	Physical Interaction	356
10.4.3	Noise and Vibration	359
10.4.4	Fire	362
10.4.5	Emissions	363
10.4.6	Cumulative Risk	365
10.5	Subterranean Fauna	383
10.5.1	Clearing and Earthworks	385
10.5.2	Physical Presence of Gas Processing Facility	385
10.5.3	Wastewater Discharge	386
10.5.4	Noise and Vibration	387
10.5.5	Spills and Leaks	387
10.5.6	Unpredicted CO ₂ Migration	388
10.5.7	Cumulative Risk	388
10.6	Conclusion	396

11	Marine Environment – Risks and Management	400
11.1	Introduction	402
11.2	Physical Environment	402
11.2.1	Seabed Substrates	403
11.2.2	Foreshore	406
11.3	Benthic Primary Producers (Marine Macrophytes and Corals)	422
11.3.1	Seabed Disturbance	423
11.3.2	Leaks and Spills	449
11.4	Benthic Primary Producer Habitats	462
11.4.1	West Coast and North Coast	465
11.4.2	East Coast	468
11.4.3	Mainland Coast	476
11.5	Marine Fauna	480
11.5.1	Seabed Disturbance	484
11.5.2	Physical Interaction	489
11.5.3	Light	494
11.5.4	Noise and Vibration	504
11.5.5	Leaks or Spills	507
11.5.6	Cumulative Risk	511
11.6	Conclusion	527
12	Quarantine – Risks and Management	530
12.1	Introduction	531
12.1.1	Quarantine Management Objectives	531
12.1.2	Key Quarantine Terminology	533
12.1.3	Chapter Outline	533
12.2	Approach to Quarantine Management	534
12.2.1	EPA Advice	534
12.2.2	Quarantine Expert Panel	535
12.2.3	Community Involvement	537
12.2.4	Best Practice Benchmarking	540
12.2.5	Expert Advice	541
12.2.6	Standards for Acceptable Risk	542
12.3	Existing Environment	542
12.3.1	Conservation Values of Barrow Island	542
12.3.2	Quarantine Experience	542
12.3.3	Historical and Existing Presence of Non-indigenous Species	543
12.3.4	Baseline and Early Survey Strategies	544
12.3.5	Terrestrial Baseline Data	546
12.3.6	Marine Baseline Data	546

12.4	Gorgon Quarantine Risk Management	548
12.4.1	Introduction to Risk-based Management.....	548
12.4.2	Risk Assessment Method.....	548
12.4.3	Development of Standards for Acceptable Risk.....	554
12.4.4	Identification of Quarantine Threats	561
12.5	Quarantine Barrier Selection.....	562
12.5.1	Quarantine Barrier Selection Method.....	563
12.5.2	Systematic Quarantine Barriers for all Pathways.....	566
12.5.3	Management of Quarantine on the Sand and Aggregate Pathway	567
12.5.4	Management of Quarantine on the Food and Perishables Pathway	569
12.5.5	Management of Quarantine on the Personnel and Accompanying Luggage Pathway.....	574
12.5.6	Management of Quarantine on the Marine Vessels Pathway	575
12.5.7	Management of Quarantine for Rodents on Marine Vessels	578
12.5.8	Monitoring Strategy	579
12.5.9	Response Strategy	581
12.6	Quarantine Management System	584
12.6.1	Introduction.....	584
12.6.2	Elements of the QMS	584
12.6.3	System Implementation.....	585
12.7	Conclusion	592
13	Greenhouse Gas Emissions – Risks and Management.....	594
13.1	Introduction.....	596
13.1.1	Commitment to Greenhouse Gas Management	597
13.1.2	Impact on National and State Greenhouse Gas Emissions.....	599
13.1.3	The Relative Greenhouse Impact of LNG.....	600
13.2	Alternative Greenhouse Gas Abatement Options.....	601
13.3	Gorgon Development Greenhouse Gas Emissions	603
13.3.1	Greenhouse Gas Emissions Efficiency Improvements.....	603
13.3.2	Emissions Estimation Methodology	605
13.3.3	Emissions During Construction and Commissioning.....	606
13.3.4	Emissions from Operations	608
13.3.5	Greenhouse Gas Emissions during Decommissioning	615
13.3.6	Benchmarked Greenhouse Gas Emission Performance.....	615
13.4	Disposal of Reservoir Carbon Dioxide by Injection into the Dupuy Formation.....	619
13.4.1	Assessment of Potential Carbon Dioxide Injection Sites.....	620
13.4.2	Location of Carbon Dioxide Injection on Barrow Island	624
13.4.3	Geology of Barrow Island.....	626
13.4.4	Carbon Dioxide Behaviour in the Subsurface	632
13.4.5	Reservoir Simulation.....	643
13.4.6	Deviations from Simulation Predictions.....	647
13.4.7	Monitoring of Injected Carbon Dioxide	648
13.4.8	Carbon Dioxide Injection Operations Management Plan.....	649
13.4.9	Environmental Impact of Carbon Dioxide Injection Infrastructure	663
13.4.10	Potential Failure Modes Related to Carbon Dioxide Injection	663
13.4.11	Approach to Long-term Responsibilities.....	676

13.5	Greenhouse Gas Management Plan.....	677
13.5.1	Membership of Government Programs.....	677
13.5.2	Planned Actions to Reduce Greenhouse Gas Emissions.....	678
13.5.3	Greenhouse Gas Emissions Performance Indicators and Targets.....	679
13.6	Compliance with EPA Guidance Notes.....	680
13.6.1	Guidance Note No 12: Minimising Greenhouse Gasses.....	680
13.6.2	Guidance Note No 4: Deep and Shallow Well Injection for Disposal of Industrial Waste.....	680
13.7	Conclusions.....	680
14	Social and Cultural Environment – Effects and Management.....	682
14.1	Introduction.....	684
14.1.1	Standards for Social Impact Assessment.....	684
14.1.2	Risk-Based Assessment Approach.....	684
14.2	Social Factors Requiring Assessment.....	686
14.3	Government Policy and Plans.....	686
14.3.1	Local Policy and Plans.....	686
14.3.2	Regional – Policy and Plans.....	686
14.3.3	State – Policy and Plans.....	689
14.3.4	Federal – Policy and Plans.....	691
14.3.5	Summary of Major Benefits and Risks to Federal Government Policy and Plans.....	691
14.4	Local Communities.....	694
14.4.1	Population.....	694
14.4.2	Social Infrastructure and Regional/Local Services.....	694
14.4.3	Summary of Major Benefits and Risks for Local Communities.....	695
14.5	Livelihoods and Lifestyle.....	695
14.5.1	Changes to Lifestyle.....	695
14.5.2	Changes to Sources of Income.....	697
14.5.3	Opportunities for Development.....	697
14.5.4	Employment.....	697
14.5.5	Summary of Benefits and Risks to Livelihoods and Lifestyle.....	698
14.6	Land and Sea Use and Tenure.....	698
14.6.1	Environmental and Conservation Uses of Barrow Island.....	698
14.6.2	Existing Oil Operations on Barrow Island.....	698
14.6.3	Mardie Station Pastoral Lease.....	699
14.6.4	Sea Use.....	699
14.6.5	Summary of Residual Risk to Land and Sea Tenure.....	701
14.7	Native Title.....	704
14.8	Cultural Heritage.....	705
14.8.1	Indigenous Anthropology.....	705
14.8.2	Indigenous Archaeology.....	705
14.8.3	Historical and Maritime Heritage – Terrestrial.....	708
14.8.4	Maritime Heritage – Subsea.....	708
14.8.5	Summary of Heritage Impacts and Management Response.....	708
14.8.6	Summary of Risk.....	709

14.9	Landscape and Aesthetics	709
14.9.1	Overview	709
14.9.2	Visual Absorption Capability and Assessment of Visual Amenity	709
14.9.3	Visual Effect	711
14.9.4	Mitigation of Visual Impact	715
14.9.5	Summary of Risk	715
14.10	Workforce and Public Health and Safety	717
14.10.1	Occupational Health – Gorgon Development Workforce	717
14.10.2	Public Health and Safety	717
14.10.3	Summary of Risk	718
14.11	Public Risk Assessment	722
14.11.1	Pipelines	722
14.11.2	Gas Processing Facility	726
14.12	Conclusions	727
15	Economic Environment – Effects and Benefits	728
15.1	Introduction	729
15.2	Economic Analysis	729
15.2.1	Assumptions	729
15.2.2	National and State Economic Growth	730
15.2.3	Regional Development	731
15.2.4	Government Revenue	731
15.3	Impacts on the Domestic Gas Market	732
15.4	Local Content	733
15.5	Capacity Building	733
15.5.1	Technology and Skills Transfer	733
15.5.2	Development of a Petroleum Service Hub	734
15.6	Expansion of the Development	735
15.7	Conclusion	735
16	Environmental Management Framework	736
16.1	Introduction	737
16.2	Key Elements of the Environmental Management System	739
16.2.1	Policy	739
16.2.2	Objectives and Targets	739
16.2.3	Leadership and Commitment	742
16.2.4	Organisation Structure and Responsibility	742
16.2.5	Operational Control	742
16.2.6	Documentation and Reporting	742
16.2.7	Training, Awareness and Competence	743
16.2.8	Monitoring	743
16.2.9	Auditing	744
16.2.10	Non-Conformance and Corrective Action	744
