

	<b>Attachment A</b> <b>Wheatstone Australian Industry Participation (AIP) Policy</b>	
--	---	---

***As a major Australian gas project, the Wheatstone Project will actively support Australian Industry Participation as a core business policy by providing full, fair and reasonable opportunity for Australian industry to supply goods and services to the Project , in line with the Australian Industry Participation National Framework.***

To fulfil the objectives of this policy, the Wheatstone Project will:

- Utilise the resources of the Industry Capability Network Western Australia (ICNWA) and other sources including ProjectConnect, Supplybase Vendor Registration System, Pilbara Business Capability Register (ePilbara) and other vendor registration systems, as appropriate, to identify those Australian companies able to supply goods or services commensurate with the quality, safety, environmental, reliability and delivery standards and objectives of the Project.
- Provide information and facilitate briefings to Australian industry in order for local suppliers to have adequate time to identify potential opportunities.
- Identify structural impediments to competitive Australian Industry participation, such as infrastructure and skills shortages, and with ICNWA support, make industry and government aware of any such perceived limitations.
- Encourage offshore manufacturing and service companies, who have leading edge technology applicable to the Wheatstone Project, to establish local facilities or manufacturing licensees and to aid in technology transfer.
- Assist Australian industry in forming strategic joint ventures or alliances with offshore companies.
- Facilitate contractor and subcontractor alignment with the policy, by including our AIP requirements in all contracts and purchase orders. The AIP requirements shall be a condition that is reflected in all subcontracts and contractor placed purchase orders.
- Ensure that Australian design, engineering, manufacturing, construction and project management capabilities are considered when preparing scopes of work to enhance Australian industry opportunities, without impacting Wheatstone Project’s safety, environment, reliability, quality, cost or schedule objectives.
- Establish a supplier diversity program that works with regional organisations, indigenous organisations and ICNWA to establish links between the Wheatstone Project and local business, including capability register and capacity building activities.
- Establish a measurement system to track and report the extent to which Australian industry is utilised.
